

TERA — 2018

3rd International Conference Terahertz and Microwave Radiation: Generation, Detection and Applications

October 22—25, 2018

Institute of Applied Physics of the Russian Academy of Sciences
46 Ulyanov Street · 603950 · Nizhny Novgorod · Russia

PROGRAM

Nizhny Novgorod
IAP RAS
2018

Organizers

Institute of Applied Physics
of the Russian Academy of Sciences

M.V. Lomonosov Moscow State University

Budker Institute of Nuclear Physics
of the Siberian Branch of the Russian Academy of Sciences

Scientific Production Enterprise GYCOM (GYCOM Ltd.)

Sponsors

www.tydex.com

www.keysight.com

www.oessp.ru

www.rohde-schwarz.com

www.terasense.com

Conference Chairman

- **Mikhail Yu. Glyavin** Institute of Applied Physics RAS, Nizhny Novgorod, Russia

Conference Co-Chairs

- **Boris A. Knyazev** Budker Institute of Nuclear Physics SB RAS, Novosibirsk State University, Novosibirsk, Russia
- **Alexander P. Shkurinov** Lomonosov Moscow State University, Moscow, Russia

Scientific Secretary

- **Alexander A. Silaev** Institute of Applied Physics RAS, Nizhny Novgorod, Russia

Local Organizing Committee

Institute of Applied Physics RAS, Nizhny Novgorod, Russia

- Anton Sedov (Head)
- Tatyana Krapivnitskaya
- Olga Mocheneva
- Andrey Fokin
- Mikhail Proyavin
- Irina Morozova
- Alexander Tsvetkov
- Natalia Panova

The conference is sponsored by the Russian Foundation for Basic Research (grants №18-02-20141, №18-02-20142, №18-02-20143).

Website of the Conference: <http://tera2018.ipfran.ru>

International Advisory Committee

- **S. Alberti** Ecole Polytechnique Fédérale de Lausanne, Switzerland
- **J.-L. Coutaz** University of Savoie, France
- **G.G. Denisov** Institute of Applied Physics RAS, Nizhny Novgorod, Russia
- **Gian Piero Gallerano** ENEA, Italy
- **Toshitaka Idehara** University of Fukui, Japan
- **Young Uk Jeong** Korea Atomic Energy Research Institute, Daejeon, South Korea
- **Kodo Kawase** Nagoya University, Japan
- **R.A. Khabibullin** Institute of Ultra High Frequency Semiconductor Electronics RAS, Moscow, Russia
- **D.R. Khokhlov** Lomonosov Moscow State University, Moscow, Russia
- **S.A. Kozlov** ITMO University, Saint-Petersburg, Russia
- **G.N. Kulipanov** Budker Institute of Nuclear Physics, Novosibirsk, Russia
- **Jean Leotin** High Magnetic Field National Laboratory of Toulouse, France
- **A.G. Litvak** Institute of Applied Physics RAS, Nizhny Novgorod, Russia
- **Paolo De Natale** Istituto Nazionale di Ottica, Italy
- **Hiroyuki Nojiri** Institute for Materials Research, Tohoku University, Japan
- **Gun-Sik Park** Seoul National University, Seoul, South Korea
- **N.A. Vinokurov** Budker Institute of Nuclear Physics, Novosibirsk, Russia
- **V.L. Vaks** Institute for Physics of Microstructures RAS, Nizhny Novgorod, Russia
- **H. Schneider** Helmholtz Zentrum Dresden-Rossendorf, Dresden, Germany
- **M.Yu. Tretyakov** Institute of Applied Physics RAS, Nizhny Novgorod, Russia
- **X.-C. Zhang** Institute of Optics, University of Rochester, USA
- **Zengxiu Zhao** National University of Defense Technology, Changsha, China
- **M. I. Bakunov** Lobachevsky State University of Nizhny Novgorod, Russia

Dear participant of TERA 2018!

We are glad to see you in Nizhny Novgorod!

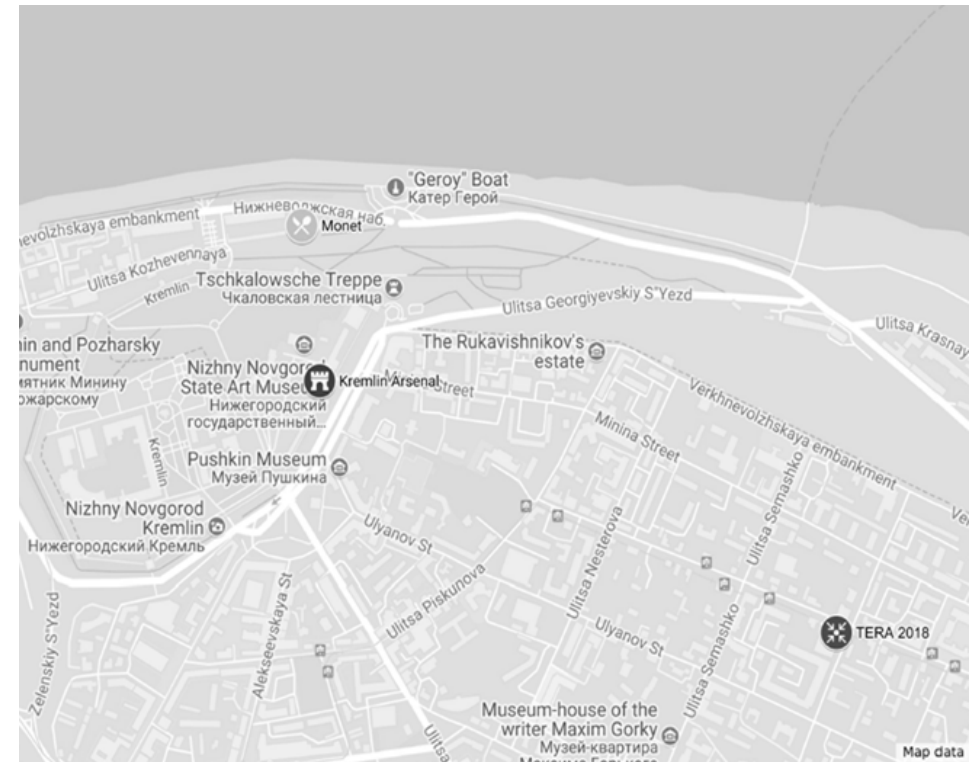

Conference venue information:

The conference will be held at Scientific and Educational Centre of the Institute of Applied Physics RAS: Bol'shaya Pecherskaya str., 31/9.

The registration desk will be organized at the 4th floor of the centre.

Welcome party will be held in the "Kremlin Arsenal" center: Kremlin str., 6.

Conference dinner will be at the "Monet" restaurant: Nizhnevolzhskaya embankment, 1b.

Time	Hall A	Hall B
Monday, October 22		
9:00	Registration starts	
14:00-14:30	OPENING (HALL A)	
14:30-16:00	Plenary session 1	
16:00-16:30	Coffee break	
16:30-18:00	S1.1 Electronic sources of THz & MW radiation, synchrotron radiation, free-electron lasers	S2.1 Optoelectronic & solid-state sources of THz radiation
19:00-21:00	Welcome party	
Tuesday, October 23		
9:00-11:00	Plenary session 2	
11:00-11:30	Coffee break	
11:30-13:30	S1.2 Electronic sources of THz & MW radiation, synchrotron radiation, free-electron lasers	S2.2 Optoelectronic & solid-state sources of THz radiation
13:30-14:30	Lunch	
14:30-16:00	Poster session 1 (Sections S6-S10)	
16:00	Excursion	
Wednesday, October 24		
9:00-11:00	Plenary session 3	
11:00-11:30	Coffee break	
11:30-13:30	S1.3 Electronic sources of THz & MW radiation, synchrotron radiation, free-electron lasers	S4.1 Quantum cascade lasers
13:30-14:30	Lunch	
14:30-16:30	S1.4 Electronic sources of THz & MW radiation, synchrotron radiation, free-electron lasers S7.1 Interaction of high-power THz and MW radiation with matter. Application of THz radiation for the research and control of ultrafast process in physics, chemistry and biology	S4.2 Quantum cascade lasers
16:30-17:00	Coffee break	
17:00-18:30	Poster session 2 (Sections S1-S5)	
20:00	Conference dinner	
Thursday, October 25		
9:00-9:40	Plenary session 4	
09:40-11:10	Special Section "Status of the User Facilities Centers"	S9.1 Systems of security and non-destructive control using THz and MW radiation. Remote sensing with THz radiation. Communication in THz frequency range
11:10-11:40	Coffee break	
11:40-13:30	Special Section "Status of the User Facilities Centers"	S5.1 Detection of THz & MW radiation. Metrology in THz frequency range
13:30-14:30	Lunch	
14:30-16:00	S9.2 Systems of security and non-destructive control using THz and MW radiation. Remote sensing with THz radiation. Communication in THz frequency range S8. Terahertz & microwave imaging: tomography, holography and near-field microscopy	S5.2 Detection of THz & MW radiation. Metrology in THz frequency range
16:00-16:30	CLOSING SESSION (Hall A)	

Hall C	Hall D
S3.1 Generation of THz radiation by intense laser pulses	S10.1 Medical and biological applications of THz radiation
S3.2 Generation of THz radiation by intense laser pulses	S6.1 Study of materials (including nano- and metamaterials) with the help of THz & MW radiation. Time-domain and CW spectroscopy
S3.3 Generation of THz radiation by intense laser pulses	S10.2 Medical and biological applications of THz radiation
S3.4 Generation of THz radiation by intense laser pulses	S10.3 Medical and biological applications of THz radiation S6.2 Study of materials (including nano- and metamaterials) with the help of THz & MW radiation. Time-domain and CW spectroscopy
S7.2 Interaction of high-power THz and MW radiation with matter. Application of THz radiation for the research and control of ultrafast process in physics, chemistry and biology	
	S6.3 Study of materials (including nano- and metamaterials) with the help of THz & MW radiation. Time-domain and CW spectroscopy
S7.3 Interaction of high-power THz and MW radiation with matter. Application of THz radiation for the research and control of ultrafast process in physics, chemistry and biology	S6.4 Study of materials (including nano- and metamaterials) with the help of THz & MW radiation. Time-domain and CW spectroscopy

Oral Sessions

	Hall A	Hall B
Monday, October 22		
9:00	Registration starts	
14:00-14:30	OPENING (HALL A)	
14:30-16:00	Plenary session 1	
	Chairman: Mikhail Glyavin	
	Efim Khazanov · Ultra-high-power-lasers Nobel prize 2018 and related research at IAP RAS Gun-Sik Park · Investigations of hydration dynamics in biomedical systems using terahertz waves	
16:00-16:30	Coffee break	
16:30-18:00	S1.1 Electronic sources of THz & MW radiation, synchrotron radiation, free-electron lasers	S2.1 Optoelectronic & solid-state sources of THz radiation
	Chairman: Vladimir Zapevalov	Chairman: Viktor Ustinov
	V. Bratman · Prospective THz gyrotrons for high-field magneto-resonance spectroscopy	V. Gavrilenko · THz stimulated emission at interband transitions in HgTe/CdHgTe quantum wells (<i>invited</i>)
	Y. Tatematsu · Recent progress in development and application of sub-THz gyrotrons in University of Fukui (<i>invited</i>)	N. Kinev · Wideband Josephson THz flux-flow oscillator integrated with the slot lens antenna and the harmonic mixer
	T. Ruess · Towards Fully Automated Systems for the Generation of Very High Order Modes in Oversized Waveguides	A. Klushin · Evidence of synchronization of large Josephson-junction arrays by traveling electromagnetic waves
	O. Dumbrajs · Possible gyrotron operation in the 'no start current' zone	V. Kurin · Active Josephson traveling wave antennae as prospective terahertz oscillators
19:00-21:00	Welcome party	

Hall C	Hall D
S3.1 Generation of THz radiation by intense laser pulses	S10.1 Medical and biological applications of THz radiation
Chairman: Stelios Tzortzakis	Chairman: Gian Piero Gallerano
T. Ozaki · THz nonlinear optics in the sub-cycle regime (<i>keynote</i>)	V. Vaks · High resolution terahertz spectroscopy for medical, biological and agricultural applications (<i>invited</i>)
O. Kosareva · Terahertz generation from single and multiple filaments in air (<i>invited</i>)	K. Zaytsev · Intraoperative diagnosis of malignant brain gliomas using terahertz pulsed spectroscopy and optical coherence tomography (<i>invited</i>)
S. Skupin · Resonant Effects in Terahertz Generation with Laser-Induced Gas Plasmas (<i>invited</i>)	Yu. Kistenev · Applications of THz laser spectroscopy and machine learning for medical diagnostics (<i>invited</i>)
I. Oladyshkin · Role of surface plasmons in laser-induced THz generation from metals	N. Chernomyrdin · Biomedical applications of terahertz solid immersion microscopy
	A. Postnikov · A device to inspect a skin cancer tumour in the terahertz range, transferring the image into the infrared

	Hall A	Hall B
Tuesday, October 23		
9:00-11:00	Plenary session 2	
	Chairman: Alexander Shkurinov	
	Andrew Martusevich · Biomedical applications of microwave radiation: innovative approaches	
	Stelios Tzortzakis · Extreme THz fields from near and mid-infrared laser filaments	
	Chi Kuang Sun · Femtosecond Acoustics and Terahertz Ultrasonics	
11:00-11:30	Coffee break	
11:30-13:30	S1.2 Electronic sources of THz & MW radiation, synchrotron radiation, free-electron lasers	S2.2 Optoelectronic & solid-state sources of THz radiation
	Chairman: Nikolay Vinokurov	Chairman: Gregory Goltsman
	Gun-Sik Park · THz generation from high-Q Fano metallic metamaterial (<i>invited</i>)	V. Ustinov · Molecular beam epitaxial growth of semiconductor heterostructures for THz electronics (<i>keynote</i>)
	A. Pankratov · Thermal regimes and THz generation from BSCCO mesas	V. Shastin · Terahertz lasers based on donor intracenter transitions in silicon (<i>invited</i>)
	A. Arzhannikov · High power THz-range Wave generation based on Transformation of Plasma Waves Pumped by High-current Relativistic Electron Beam	G. Mouret · Frequency comb for THz metrology
	A. Savilov · THz radiation of stabilized dense electron bunches	D. Ponomarev · Plasmonic terahertz antennas with high-aspect ratio metal gratings
	A. Vikharev · Generation of powerful subterahertz superradiance pulses for high gradient acceleration of charged particles	M. Kulygin · Long-Pulsed Modulation Regimes of Subterahertz Nanosecond Waveguide Switches
	A. Doria · Novel Schemes for Compact FELs in the THz Region: ENEA Experience and Perspectives (<i>invited</i>)	
13:30-14:30	Lunch	
14:30-16:00	Poster session 1 (sections S6-S10)	
16:00	Excursion	

Hall C	Hall D
S3.2 Generation of THz radiation by intense laser pulses	S6.1 Study of materials (including nano- and metamaterials) with the help of THz & MW radiation. Time-domain and CW spectroscopy
Chairman: Olga Kosareva	Chairman: Chi Kuang Sun
A. Shkurinov · Terahertz Wave Generation from Liquefied Gas (<i>invited</i>)	L. Surin · Millimeter-wave spectroscopy of weakly bound molecular complexes and small clusters (<i>invited</i>)
A. Popov · New Approach to Generation and Amplification of the THz Radiation in Plasma Created by Intense Two-Color Laser Fields (<i>invited</i>)	R. Bocquet · Modelisation of a gas phase polarization induced by a 200 GHz chirped pulse (<i>invited</i>)
A. Silaev · Laser-plasma generation of tunable ultrashort pulses in terahertz and mid-infrared ranges	E. Chesnokov · The first observation of the free induction signals of OH radicals in the terahertz region (<i>invited</i>)
S. Stremoukhov · Terahertz radiation in two-color laser fields: from single atom to extended gas response	M. Koshelev · Accurate broadband THz molecular spectroscopy
P. Chizhov · Modulation of two-color laser-induced filament terahertz emission by effective length variation.	T. Odintsova · Far IR continuum absorption of H ₂ ¹⁶ O and H ₂ ¹⁸ O
A. Ushakov · Backward terahertz emission from two-color laser induced plasma spark	M. Koshelev · Recent results on THz gyrotron-based molecular spectroscopy

	Hall A	Hall B
Wednesday, October 24		
9:00-11:00	Plenary session 3	
	Chairman: Manfred Thumm	
11:00-11:30	Alessandro Tredicucci · Terahertz quantum cascade lasers: what way forward? Dmitry Khokhlov · Terahertz probing of topological surface electron states (conference sponsors) Steffen Neidhardt , Rohde & Schwarz, · Measurement of radome material for 77/79 GHz automotive radar integration	
	Coffee break	
11:30-13:30	S1.3 Electronic sources of THz & MW radiation, synchrotron radiation, free-electron lasers	S4.1 Quantum cascade lasers
	Chairman: Olgierd Dumbrajs	Chairman: Alexei Baranov
	N. Ginzburg · Generation of Sub-Terahertz Surface Waves by Relativistic Electron Beams: Quasioptical Theory, Simulations and Experiments	L. Consolino · Metrological-grade THz radiation (<i>invited</i>)
	N. Peskov · Development of powerful long-pulse Bragg FELs operating from sub-THz to THz bands based on linear induction accelerators: recent results and projects	A. Andronov · Bloch and Wannier-Stark THz emissions in superlattices: rival of Quantum Cascade Laser?
	A. Grigoriev · Problems of amplifier klystron advancing into terahertz band	R. Arkhipov · Generation of ultra-short pulses via self-induced transparency mode-locking regime in lasers (<i>invited</i>)
	E. Myasin · Sub-THz orotron with one and two electron beams	A. Babichev · Quantum-cascade lasers of mid-IR spectral range: epitaxy, diagnostics and device characteristics (<i>invited</i>)
	N. Ryskin · Development and modeling of miniaturized traveling-wave tubes in millimeter and sub-THz band	R. Khabibullin · Terahertz quantum cascade laser with silver- and gold-based waveguide (<i>invited</i>)
	L. Revin · YBa ₂ Cu ₃ O _{7-δ} Josephson generators fabricated by preliminary topology masks	Yu. Lobanov · Characterization of the THz QCL Using Fast Superconducting Hot Electron Bolometer
13:30-14:30	Lunch	

	Hall C	Hall D
S3.3 Generation of THz radiation by intense laser pulses		S10.2 Medical and biological applications of THz radiation
Chairman: Zengxiu Zhao		Chairman: Maxim Nazarov
F. Rotermund · THz nonlinear photonics: generation and applications (<i>invited</i>)		O. Smolyanskaya · Interaction of terahertz radiation with tissue phantoms: numerical and experimental studies (<i>invited</i>)
K. Kawase · Multi wavelength injection-seeded THz parametric system (<i>invited</i>)		A. Polyakova · The mechanism of the effect of microwave radiation on the parameters of homeostasis in living systems
A. Brantov · Laser induced THz Sommerfeld waves along metal wire.		V. Zapevalov · High-power microwaves against locusts and other harmful animals
A. Kuratov · Plasma mechanisms of terahertz electromagnetic wave generation due to intense laser-plasma interaction		S. Peltek · Nonthermal impact of terahertz radiation on living systems
A. Woldegeorgis · Generation of sub GV/m longitudinal terahertz electric fields from intense laser-solid density plasma interactions		V. Denysenkov · Overhauser DNP applications at 9.4 Tesla by using terahertz irradiation
D. Zhang · Coherent multichannel dynamics of aligned molecules resolved by two dimensional high-harmonic and terahertz spectroscopy (2D-HATS) (<i>invited</i>)		V. Anfertev · Application of high resolution subTHz spectroscopy methods for analysing the content of grain odors

	Hall A	Hall B
Wednesday, October 24		
14:30-16:30	S1.4 Electronic sources of THz & MW radiation, synchrotron radiation, free-electron lasers	S4.2 Quantum cascade lasers
	Chairman: Yoshinori Tatematsu	Chairman: Rustam Khabibullin
	A. Marek · Simulation of components for gyro-devices coupled in a feedback loop to generate ultra-short RF pulses	A. Baranov · Long wavelength InAs-based quantum cascade lasers (<i>keynote</i>)
	V. Zaslavsky · Terahertz-Range Gyrodevices of Planar Geometry	A. Khudchenko · Overview of Techniques for THz QCL phase-locking (<i>invited</i>)
	D. Sobolev · 3D printed periodic structures for subterahertz sources	K. Maremyanin · Investigation of the emission spectra of pulsed THz quantum cascade lasers and their use for magnetospectroscopy of semiconductors
	V. Tsarev · Quasi-fractal PBG structures for Multi-Beam Devices	M. Nazarov · Polymer waveguides for THz QCL radiation delivery and filtering (<i>invited</i>)
	S7.1 Interaction of high-power THz and MW radiation with matter. Application of THz radiation for the research and control of ultrafast process in physics, chemistry and biology	I. Vasil'evskii · Temporal stability and absolute composition issues in molecular beam epitaxy of AlGaAs/GaAs THz QCL
	V. Pavelyev · Terahertz optical elements for control of high-power laser irradiation (<i>keynote</i>)	F. Zubov · 3 THz quantum-cascade laser with metallic waveguide based on resonant-phonon depopulation scheme
16:30-17:00	Coffee break	
17:00-18:30	Poster session 2 (sections S1-S5)	
20:00	Conference dinner	

	Hall C	Hall D
	S3.4 Generation of THz radiation by intense laser pulses	S10.3 Medical and biological applications of THz radiation
	Chairman: Kodo Kawase	Chairman: Vladimir Vaks
	M. Clerici · Broadband THz generation and detection (<i>invited</i>)	M. Nazarov · Spectroscopy of solutions in the low frequency extended THz frequency range (<i>invited</i>)
	S. Sychugin · Generation of DC fields ahead of ultrashort laser pulses in electro-optic crystals	O. Cherkasova · Study of blood and its components by terahertz pulsed spectroscopy (<i>invited</i>)
	Yu. Klimachev · THz sources based on frequency conversion of multi-line molecular lasers in nonlinear crystals and on optically pumped molecular lasers	I. Ozheredov · Application of THz radiation for in situ control of eye cornea hydration level (<i>invited</i>)
	N. Kuzechkin · Study of the cluster formation dynamics and its affect on generation of THz and X-Ray radiation in the expanding gas jet	M. Khodzitsky · THz time-domain spectroscopy for non-invasive assessment of water content in biological samples
	I. Kinyaevskiy · CO laser down-conversion into the THz range with ZnGeP ₂ crystal	S6.2 Study of materials (including nano- and metamaterials) with the help of THz & MW radiation. Time-domain and CW spectroscopy
	S. Bodrov · A modified tilted-pulse-front excitation scheme for efficient terahertz generation in LiNbO ₃	K. Motovilov · Water and conductivity in bioorganic materials: complicated interplay (<i>invited</i>)
		E. Zhukova · H ₂ O molecules hosted by a crystalline matrix – new state of water. (<i>invited</i>)

	Hall A	Hall B
Thursday, October 25		
9:00-9:40	Plenary session 4	
	Chairman: Vladimir Bratman	
	Nikolay Vinokurov · Generating High Power Terahertz and Far Infrared Electromagnetic Radiation with Relativistic Electrons	
09:40-11:10	Special Section "Status of the User Facilities Centers"	S9.1 Systems of security and non-destructive control using THz and MW radiation. Remote sensing with THz radiation. Communication in THz frequency range
	Chairman: Boris Knyazev	Chairman: Leonid Skvortsov
	M. Glyavin · From millimeter to microns - IAP RAS powerful sources for various applications (<i>keynote</i>)	S. Varentsova · Detection and identification of a substance with an inhomogeneous surface using the effective time-dependent THz spectroscopy method and emission frequency up-conversion (<i>invited</i>)
	Y.U. Jeong · Ultrafast THz-pump & Electron-probe Facility at KAERI (<i>keynote</i>)	Yu. Choporova · Measuring the topological charge of vortices with diffraction and interference techniques
	O. Shevchenko · Novosibirsk free electron laser facility (<i>keynote</i>)	D. Pavelev · Devices and system based on quantum semiconductor superlattices for the frequency range 0.1-10 THz.
		A. Angeluts · Influence of pollution and extraneous inclusions on the scattering of THz radiation by fabric A. Fokin · Using a gyrotron as a source of modulated radiation for data transmission systems in the terahertz range
11:10-11:40	Coffee break	

Hall C	Hall D
S7.2 Interaction of high-power THz and MW radiation with matter. Application of THz radiation for the research and control of ultrafast process in physics, chemistry and biology	
Chairman: Andrey Stepanov	
A. Savel'ev · Nonlinear Transfer of Intense Few Cycle Terahertz Pulse Through Opaque semiconductors (<i>invited</i>)	
S. Kozlov · Disappearance of Self-Focusing for Few-Cycle THz Pulses (<i>invited</i>)	
M. Krikunova · Ultrafast multi-electron dynamics studied with THz-field streaking	
K. Grishunin · Terahertz induced magnetization dynamic in a weak ferromagnet FeBO ₃	
S. Pavlov · Challenges of Raman scattering at THz frequencies	

	Hall A	Hall B
Thursday, October 25		
11:40-13:30	Special Section "Status of the User Facilities Centers"	S5.1 Detection of THz & MW radiation. Metrology in THz frequency range
	Chairman: Young Uk Jeong	Chairman: Vyacheslav Vdovin
	B. Knyazev · Recent experiments at NovoFEL user stations (<i>keynote</i>)	G. Kitaeva · Optical – terahertz biphotons (<i>invited</i>)
	J.M. Klopff · THz science at FELBE (<i>keynote</i>)	I. Ilyakov · Terahertz Electro-Optic Sampling in Crystals with High Natural Birefringence
	G.P. Gallerano · Terahertz and mm-wave applications at ENEA- Frascati (<i>keynote</i>)	A. Bogatskaya · Optical- mechanical analogy approach for the purposes of detection of IR-MW radiation
		V. Koshelets · Low-noise THz- range SIS Receivers for Ground- based and Space Radio Astronomy
	A. Shugurov · Terahertz pulse detection by direct intensity modulation of the probe laser beam in GaAs	
	E. Suchkov · Terahertz, sub-mm and millimeter wave instrumentation and components	
13:30-14:30	Lunch	

	Hall C	Hall D
		S6.3 Study of materials (including nano- and metamaterials) with the help of THz & MW radi- ation. Time-domain and CW spectroscopy
		Chairman: Mikhail Tretyakov
		A. Nikitin · Terahertz plasmonics: achievements and prospects (<i>invited</i>)
		N. Nikolaev · Oxide nonlinear crystals: optical prop- erties and phase-matching for terahertz wave gen- eration (<i>invited</i>)
		E. Serov · Dielectrics for output windows of medium power gyrotrons
		S. Bodrov · Terahertz induced optical second har- monic generation from dielectric interfaces: mecha- nism and application
		M. Gafurov · Coherent control of electron-nuclear states of rare-earth ions in crystals using radio- frequency and microwave radiation.
		M. Khodzitsky · Optically tunable dielectric properties of single-walled carbon nanotubes for terahertz wave applications

	Hall A	Hall B
Thursday, October 25		
14:30-16:00	S9.2 Systems of security and non-destructive control using THz and MW radiation. Remote sensing with THz radiation. Communication in THz frequency range	S5.2 Detection of THz & MW radiation. Metrology in THz frequency range
	Chairman: Alexander Kostrov	Chairman: Dmitry Khokhlov
	P. Mounaix · Submillimeter wave Tomography and image processing advances: Applications additive manufacturing quality control (<i>invited</i>)	V. Vdovin · Arrays of annular antennas with SINIS bolometers for SubTHz radioastronomy
	L. Skvortsov · The concept of construction of inspection systems based on quantum-cascade lasers	I. Andreev · Imaging of powerful terahertz beams
	G. Katyba · Microstructured sapphire shaped crystals for anitiresonant and bandgap terahertz waveguiding	A. Sobolev · Wideband metamaterial-based array of SINIS bolometers
	S8. Terahertz & microwave imaging: tomography, holography and near-field microscopy	A. Khudchenko · Sideband Separating SIS receiver for 650 GHz developed by NOVA
	I. Dolganova · Impact of Scattering in Quasi-Ordered Structures on THz Imaging	L. Kuzmin · Efficient electron cooling in Cold Electron Bolometers
	A. Martusevich · Comparative study of dielectric properties of the skin of human and laboratory animals	A. Mamrashev · Terahertz time-domain spectrometer with precision delay line encoder
16:00-16:30	CLOSING SESSION (Hall A)	

Hall C	Hall D
S7.3 Interaction of high-power THz and MW radiation with matter. Application of THz radiation for the research and control of ultrafast process in physics, chemistry and biology	S6.4 Study of materials (including nano- and metamaterials) with the help of THz & MW radiation. Time-domain and CW spectroscopy
Chairman: Vladimir Pavelyev	Chairman: Elena Zhukova
V. Kubarev · Experiments using extreme parameters of NovoFEL radiation (<i>invited</i>)	A. Boris · Exploring in-gap excitations in high-Tc superconducting films by THz and infrared spectroscopy (<i>invited</i>)
R. Zhukavin · Relaxation of Coulomb states in semiconductors probed by FEL radiation	N. Nikolaev · Angle-Susceptible Sensing Metasurface in Terahertz Regime
O. Chefonov · Interaction of high-power terahertz radiation with metallic films	M. Bezhko · Dielectric and Magnetic Material Characterization Techniques up to 1,5 THz
	A.A. Gvdush · Terahertz time-domain spectroscopy of astrophysical ice analogs: A pilot study

Poster Session 1. Tuesday, October 23

S6. Study of materials (including nano- and metamaterials) with the help of THz & MW radiation. Time-domain and CW spectroscopy

- P.6.1 **V. Kukotenko** · Single-color pump-probe setup at the NovoFEL facility for measurements of carrier relaxation dynamics in semiconductors
- P.6.2 **R. Dawson** · Closing the terahertz gap: a composite approach toward measuring continuous dielectric functions from microwave to visible wavelengths
- P.6.3 **P. Demchenko** · Study of influence of densification on control of conductivity and spectral characteristics of thin films of carbon nanotubes in terahertz frequency range
- P.6.4 **D. Gomon** · Absorbance of oxipane material in THz frequency range
- P.6.5 **K. Kuznetsov** · Generation of terahertz pulses from the island films of topological insulator Bi₂-xSbxTe₃-ySey
- P.6.6 **I. Tzibizov** · Investigation of the properties of a 3-level broadband antireflective structure on silicon by THz time-domain spectroscopy.
- P.6.7 **A. Grebenchukov** · Terahertz spectroscopy of graphene-based materials on different substrates under external infrared optical pumping
- P.6.8 **E. Litvinov** · Aligned planar-wire zero-index metamaterial for terahertz frequency range
- P.6.9 **E. Malkova** · Nonlinear quantum interferometry in terahertz spectroscopy
- P.6.10 **M. Masyukov** · Geometry impact on polarizing properties of terahertz chiral metasurface
- P.6.11 **Yu. Sergeev** · Terahertz induced optical second harmonic generation from silicon surface
- P.6.12 **T. Krapivnitskaia** · Pulsed magnets with high field intensity for laser-plasma experiments and TDS spectroscopy
- P.6.13 **A. Malkin** · Terahertz Range Surface-Wave Bragg Resonators with Optimized Ratio between Ohmic and Radiative Losses
- P.6.14 **E. Serov** · Ceramic materials for microwave applications
- P.6.15 **D. Sharovarov** · Effect of MIT in epitaxial VO₂ films on THz transmittance

S7. Interaction of high-power THz and MW radiation with matter. Application of THz radiation for the research and control of ultrafast process in physics, chemistry and biology

- P.7.1 **N. Osintseva** · Vector and mixed beams with orbital angular momentum

S8. Terahertz & microwave imaging: tomography, holography and near-field microscopy

- P.8.1 **D. Yanin** · Subsurface diagnostics of quasi-one-dimensional inhomogeneities using the method of near-field microwave sounding
- P.8.2 **D. Yanin** · Diagnostics of biological tissues by methods of near-field microwave - sounding
- P.8.3 **O. Kameshkov** · Generation of vortex beamlet lattices via diffraction of Bessel vortex beams on 2D hole arrays: analytical and numerical calculations and comparison with experiments
- P.8.4 **A. Martusevich** · Microwave imaging of skin damage at experimental burns
- P.8.5 **A. Martusevich** · Diagnostic value of microwave imaging of dielectric tissues properties in patients with Dupuytren disease

S9. Systems of security and non-destructive control using THz and MW radiation. Remote sensing with THz radiation. Communication in THz frequency range

- P.9.1 **G. Bubnov** · Svalbard astroclimate research: expedition and first results.
- P.9.2 **I. Lesnov** · Investigation of the influence of the location on the rate of Sub THz space communications channels
- P.9.3 **K. Moldosanov** · Two-phonon scheme of generating soft terahertz radiation by gold nanobars for detection of hidden objects

S10. Medical and biological applications of THz radiation

- P.10.1 **A. Avseenko** · Definition of thresholds of the heating effects of THz radiation on cancer cells.
- P.10.2 **V. Denysenkov** · Compact DNP polarizer for MRI applications at 1.5 Tesla
- P.10.3 **I. Kublanova** · The research method of a qualitative analysis of the composition of the blood in the terahertz frequency range.
- P.10.4 **S. Gusev** · Investigation of interaction of THz radiation with blood components for diabetes mellitus diagnostics
- P.10.5 **A. Semenova** · THz absorption spectra of glucose and its polymers
- P.10.6 **T. Zhang** · Study of PVC-based Skin Phantom with graphite particles in Terahertz Frequency Range
- P.10.7 **M. Presnyakova** · Study of biochemical and hemostasiological parameters under the influence of low-intensity microwave noise radiation
- P.10.8 **A. Soloveva** · The influence of terahertz radiation on biochemical metabolism of blood in the experiment
- P.10.9 **M. Glyavina** · Morphological analysis of microglia in early postischemic period in the mouse local cerebral ischemia

Poster Session 2. Wednesday, October 24

S1. Electronic sources of THz & MW radiation, synchrotron radiation, free-electron lasers

- P.1.1 **A. Adilova** · Study of mutual phase locking of two gyrotrons coupled with delay
- P.1.2 **A. Badarin** · Double-Beam Millimeter-Wave Band BWT And TWT On A Spirally Bent Rectangular Waveguide
- P.1.3 **V. Manuilov** · Electron-optics systems with decreased life-time of trapped electrons for terahertz band gyrotrons
- P.1.4 **M. Morozkin** · Development of the prototype of high power sub-THz gyrotron for advanced fusion power plant (DEMO)
- P.1.5 **R. Rozental** · Rogue-waves generation in the terahertz region
- P.1.6 **R. Rozental** · Gyrotrons with shortened cavities as tunable sources of powerful subterahertz radiation for spectroscopic applications
- P.1.7 **A. Savilov** · High-harmonic gyrotrons with irregular microwave systems
- P.1.8 **A. Zuev** · The project of third harmonic medium power W-band gyrotion
- P.1.9 **E. Myasin** · Unknown peculiarity of the orotron two row periodic structure
- P.1.10 **M. Vilkov** · Generation of Ultrashort Microwave Pulses in Passive Mode-Locked Electron Oscillators with Homogeneous and Inhomogeneous Line Broadening
- P.1.11 **R. Rozental** · Generation of Ultra-Short Microwave Pulses in a Tunable Gyrotron with Subsequent Compression
- P.1.12 **A. Fokin** · Frequency control in subterahertz gyrotrons
- P.1.13 **A. Fedotov** · Design of mm-wave slow-wave devices with sheet and hollow electron beams
- P.1.14 **I. Davidyuk** · Fast magnetic measurements of 8.6 m undulator
- P.1.15 **V. Zaslavsky** · Powerful surface-wave oscillators with one-dimensional and two-dimensional periodic planar structures
- P.1.16 **V. Zapevalov** · Various types of echelette resonators for gyrotrons
- P.1.17 **L. Yurovsky** · Transformation of High-Power Gyrotron Output Radiation Frequency under Conditions of Raman Scattering on Auxiliary Electron Beam
- P.1.18 **N. Pristupchik** · Design and process flow of the buried-emitter cathode for a low-power terahertz BWO

- P.1.19 **R. Shaposhnikov** · Gyrotron mm-wave radiation for dense plasma fluxes production from ECR discharge in a single solenoid

S2. Optoelectronic & solid-state sources of THz radiation

- P.2.1 **M. Kagan** · Electronic Tunneling and Electric Domains in GaAs/AlAs Superlattices at Room Temperature
- P.2.2 **S. Paprotsky** · High Photoconductivity in Heavily Doped GaAs/AlAs Superlattices with Electric Domains
- P.2.3 **I. Ilyakov** · Continuously Tunable Spintronic Emission in the sub-THz Range
- P.2.4 **A. Leontyev** · Generation of THz radiation by photoconductive antennas on based thin films InGaAs and InGaAs/InAlAs
- P.2.5 **N. Peskov** · Theoretical and experimental studies of dielectric two-dimensional Bragg structures for development of spatially-extended heterolasers
- P.2.6 **V. Rumyantsev** · Doubling of gyrotron radiation frequency due to nonlinear susceptibility in A3B5 semiconductors

S3. Generation of THz radiation by intense laser pulses

- P.3.1 **A. Frolov** · The dipole mechanism of terahertz waves emission under laser action on clusters
- P.3.2 **B.J. Kang** · Manipulation of Highly Nonlinear Organic Crystals for Efficient Optical-to-THz Conversion
- P.3.3 **E. Moiseenko** · Temperature variation in the process of terahertz wave generation by intense laser pulses
- P.3.4 **N. Yudin** · Generation of broadband terahertz radiation in ZnGeP₂ by optical rectification
- P.3.5 **N. Yudin** · Generation of terahertz radiation on the difference frequency in ZnGeP₂
- P.3.6 **A. Silaev** · Quantum-mechanical simulations of low-frequency current excitation during ionization of many-electron atoms by intense laser pulses
- P.3.7 **I. Osovitskaya** · Interplay effects of carrier-envelope phase and plasmon resonances in terahertz generation by ionizing ultrashort optical pulses

S4. Quantum cascade lasers

- P.4.1 **A. Andronov** · THz Quantum Cascade Laser cavities emission beams and losses
- P.4.2 **P. Solyankin** · Reconfigurable terahertz optics based on etched structures in vanadium dioxide thin films

S5. Detection of THz & MW radiation. Metrology in THz frequency range

- P.5.1 **A. Gordeeva** · Cold-electron bolometers as a photon-noise-limited detector with on-chip electron self-cooling
- P.5.2 **V. Koshelets** · Spectral measurements of THz radiation emitted from intrinsic Josephson junction stacks
- P.5.3 **M. Philippov** · Future scientific experiment "SUN-TERAHERTZ"
- P.5.4 **I. Tretyakov** · Technology for NbN HEB based multipixel matrix of THz range
- P.5.5 **G. Yakopov** · Array of planar antennas with SINIS bolometers for BTA
- P.5.6 **V. Belosevich** · Response of carbon nanotube film transistor to the THz radiation
- P.5.7 **T. Novikova** · Temperature dependence of signal spectra generated via spontaneous parametric down-conversion in strongly frequency non-degenerate regime

List of talks with authors and affiliations

Plenary talks

- Ultra-high-power-lasers Nobel prize 2018 and related research at IAP RAS*
Efim A. Khazanov
Institute of Applied Physics RAS, Nizhny Novgorod, Russia
 - Terahertz Probing of Topological Surface Electron States*
Dmitry Khokhlov^{1,2}, A. V. Galeeva¹, L. I. Ryabova³
¹Physics Department, M.V. Lomonosov Moscow State University, Moscow, Russia,
²P.N. Lebedev Physical Institute, Moscow, Russia
³Chemistry Department, M.V. Lomonosov Moscow State University, Moscow, Russia
 - Investigations of hydration dynamics in biomedical systems using terahertz waves*
Kihoon Eom, Jungmin Jang, Inkyung Park, Sunmyeong Kim, Seungmok Yum, Juhan Kim, Kyunghoon Jung, Haesung Lee, Debashis Majhi, Gun-Sik Park
Department of Physics and Astronomy, Seoul National University, Seoul, Korea
 - Femtosecond Acoustics and Terahertz Ultrasonics*
Chi-Kuang Sun
Graduate Institute of Photonics and Optoelectronics, National Taiwan University, Taipei, Taiwan
 - Terahertz quantum cascade lasers: what way forward?*
Alessandro Tredicucci^{1,2}
¹Dipartimento di Fisica "E. Fermi", Università di Pisa, Italy
²NEST, CNR Istituto Nanoscienze and Scuola Normale Superiore, Pisa, Italy
 - Extreme THz fields from near and mid-infrared laser filaments*
Stelios Tzortzakis
Science Program, Texas A&M University at Qatar, Doha, Qatar
Institute of Electronic Structure and Laser, Heraklion, Greece
Department of Materials Science and Technology, University of Crete, Heraklion, Greece
 - Biomedical applications of microwave radiation: innovative approaches*
A.K. Martusevich^{1,2}, A. V. Kostrov³
¹Privolzhsky Research Medical University, Nizhny Novgorod, Russia
²Kirov State Medical University, Kirov, Russia
³Institute of Applied Physics RAS, Nizhny Novgorod, Russia
 - Generating High Power Terahertz and Far Infrared Electromagnetic Radiation with Relativistic Electrons*
N.A. Vinokurov^{1,2}
¹Budker Institute of Nuclear Physics SB RAS, Novosibirsk, Russia,
²Novosibirsk State University, Novosibirsk, Russia
 - Measurement of radome material for 77/79 GHz automotive radar integration*
Steffen Neidhardt, Steffen Heuel, Tobias Koeppel, Sherif Ahmed
Rohde & Schwarz, Munich, Germany
- ### S1. Electronic sources of THz & MW radiation, synchrotron radiation, free-electron lasers
- Study of mutual phase locking of two gyrotrons coupled with delay*
A.B. Adilova¹, N.M. Ryskin^{1,2}
¹Saratov State University, Saratov, Russia
²Saratov Branch, Institute of Radio Engineering and Electronics, Saratov, Russia
 - High power THz-range Wave generation based on Transformation of Plasma Waves Pumped by High-current Relativistic Electron Beam*
A.V. Arzhannikov^{1,2}, V.V. Annenkov^{1,2}, V.S. Burmasov^{1,2}, I.A. Ivanov^{1,2}, A.A. Kasatov^{1,2}, S.A. Kuznetsov^{1,2}, M.A. Makarov¹, K.I. Mekler¹, S.V. Polosatkin^{1,2}, V.V. Postupaev^{1,2},

- A.F. Rovenskikh¹, D.A. Samtsov^{1,2}, S.L. Sinitsky^{1,2}, V.F. Sklyarov^{1,2}, V.D. Stepanov^{1,2}, I.V. Timofeev^{1,2}, E.P. Volchok^{1,2}**
¹Budker Institute of Nuclear Physics RAS, Novosibirsk, Russia
²Novosibirsk State University, Novosibirsk, 630090, Russia
3. *Prospective THz Gyrotrons for High-Field Magneto-Resonance Spectroscopy*
V.L. Bratman^{1,2}, A.E. Fedotov², Yu.K. Kalynov², V.N. Manuilov^{2,3}
¹Ariel University, Ariel, Israel
²Institute of Applied Physics of RAS, Nizhny Novgorod, Russia
³Nizhny Novgorod State University, Nizhny Novgorod, Russia
4. *Fast Magnetic Measurements of 8.6 m Undulator*
I. V. Davidiyuk^{1,2}, Ya. I. Gorbachev¹, O. A. Shevchenko¹
¹Budker INP SB RAS, Novosibirsk, Russia
²Novosibirsk State University, Novosibirsk, Russia
5. *Frequency control in subterahertz gyrotrons*
A. Bogdashov, A. Fokin, A. Fedotov, M. Glyavin, M. Morozkin, Yu. Novozhilova, M. Proyavin, R. Rozental, A. Sedov, A. Tsvetkov, I. Zotova G. Denisov
 Institute of Applied Physics of the RAS, Nizhny Novgorod, Russia
6. *Problems of Amplifier Klystron Advancing into the Terahertz Band*
A.D. Grigoriev^{1,2}
¹Saint Petersburg State Electrotechnical University "LETI", St. Petersburg, Russia
²"Svetlana-Electronpribor" JSC
7. *Electron-optics systems with decreased life-time of trapped electrons for terahertz gyrotrons*
V.N.Manuilov^{1,2}, A.L.Goldenberg¹, M.Yu.Glyavin¹, K.A.Leshcheva^{1,2}
¹Institute of Applied Physics, RAS, N. Novgorod, Russia
²Lobachevsky State University of Nizhni Novgorod, N. Novgorod, Russia
8. *Development of the Prototype of High Power Sub-THz Gyrotron for Advanced Fusion Power Plant (DEMO)*
M. Morozkin¹, G. Denisov¹, E. Tai², E. Soluyanova², A. Sedov¹, A. Fokin¹, A. Kufin¹, A. Tsvetkov¹, M. Bakulin², E. Sokolov², V. Malygin¹, M. Proyavin¹, V. Zapevalov¹, O. Mocheneva, M. Glyavin¹
¹Institute of applied physics RAS, Nizhny Novgorod, Russia
²Gycom Ltd., Nizhny Novgorod, Russia
9. *Thermal regimes and THz generation from BSCCO mesas*
L.S. Revin¹, E.A. Vopilkin¹, A.L. Pankratov¹, S.A. Kraev¹, A.A. Yablokov¹, S.A. Churin¹, A.B. Kulakov²
¹Institute for Physics of Microstructures of RAS, Nizhny Novgorod, Russia
²Institute of Solid State Physics of RAS
10. *Design and process flow of the buried-emitter cathode for a low-power terahertz BWO*
A.V. Galdetskiy, I.V. Kulikova, N.K. Pristupchik
 JSC «RPC «Istok» named after Shokin», Fryazino, Russian Federation
11. *Generation of Ultra-Short Microwave Pulses in a Tunable Gyrotron with Subsequent Compression*
R.M. Rozental¹, I.V. Zotova¹, N.S. Ginzburg¹, V.P. Tarakanov^{2,3}
¹Institute of Applied Physics RAS, Nizhny Novgorod, Russia
²Moscow Engineering Physics Institute, Moscow, Russia
³Joint Institute for High Temperatures, RAS, Moscow, Russia
12. *Gyrotrons with Shortened Cavities as Tunable Sources of Powerful Sub-Terahertz Radiation for Spectroscopic Applications*
M.Yu. Glyavin, A.E. Fedotov, R.M. Rozental, I.V. Zotova, A.S. Zuev, V.N. Manuilov, M.Yu. Tretyakov, D.S. Makarov
 Institute of Applied Physics RAS, Nizhny Novgorod, Russia
13. *Rogue-waves generation in the terahertz region*
R.M. Rozental, N.S.Ginzburg, A.M. Malkin, A.S. Sergeev, V.Yu. Zaslavsky, I.V. Zotova
 Institute of Applied Physics RAS, Nizhny Novgorod, Russia

14. *Development and Modeling of Miniaturized Traveling-Wave Tubes in Millimeter and Sub-THz Bands*
N.M. Ryskin^{1,2}
¹Saratov Branch, V.A. Kotelnikov Institute of Radio Engineering and Electronics RAS, Saratov, Russia
²Saratov State University, Saratov, Russia
15. *High-harmonic gyrotrons with irregular microwave systems*
A.V. Savilov, I.V. Bandurkin, M.Yu. Glyavin, Yu.K. Kalynov, Yu.S. Oparina, I.V. Osharin, N.A. Zavolsky
 Institute of Applied Physics RAS, N. Novgorod, Russia
16. *THz radiation of stabilized dense electron bunches*
A.V. Savilov¹, I.V. Bandurkin¹, I.S. Kurakin¹, Yu.S. Oparina¹, V.L. Bratman^{1,2}, N. Balal², Yu. Lurie²
¹Institute of Applied Physics RAS, N. Novgorod, Russia
²Ariel University, Ariel, Israel
17. *3D Printed Periodic Structures for Subterahertz Sources*
D.I. Sobolev, M.D. Proyavin, N.Yu. Peskov, V.Yu. Zaslavsky, V.V. Parshin
 Institute of Applied Physics, Nizhny Novgorod, Russia
18. *Recent progress in development and application of sub-THz gyrotrons in University of Fukui*
Y. Tatematsu
 Research Center for Development of Far-infrared Region, University of Fukui, Fukui, Japan
19. *Quasi-fractal PBG structures for Multi-Beam Devices*
V.A. Tsarev¹, D.A. Nesterov², P D. Shalaev³
¹Yuri Gagarin Saratov State Technical University, Saratov, Russia
²Yuri Gagarin Saratov State Technical University, Saratov, Russia
³AO "NPP "Almaz", Saratov, Russia
20. *Generation of Ultrashort Microwave Pulses in Passive Mode-Locked Electron Oscillators with Homogeneous and Inhomogeneous Line Broadening*
M.N. Vilkov, N.S. Ginzburg, I.V. Zotova, A.S. Sergeev
 Institute of Applied Physics RAS, Nizhny Novgorod, Russia
21. *Transformation of High-Power Gyrotron Output Radiation Frequency under Conditions of Raman Scattering on Additional Electron Beam*
L.A. Yurovskiy, N. S. Ginzburg, A.M. Malkin, A.S. Sergeev, I.V. Zotova
 Institute of Applied Physic RAS, Nizhny Novgorod, Russia
22. *Various types of echelette resonators for gyrotrons*
V.E. Zapevalov, S.N. Vlasov, E.V. Kuposova, A.N. Kufin, A.B. Paveliev, N.A. Zavolsky
 Federal Research Center Institute of Applied Physics, RAS, Nizhny Novgorod, Russia
23. *Proposed Gyrotrons and FELs frequency distributed multiplication*
A.A. Andronov, M.A. Novikov
 Institute for Physics of Microstructures RAS, Nizhny Novgorod, Russia
24. *Novel schemes for Compact FELs in the THz region: ENEA Experience and Perspectives*
A. Doria, G.P. Gallerano
 ENEA- Fusion Physics Division – Radiation Sources, Antennas and Diagnostics Laboratory, Frascati – Italy
25. *Possible gyrotron operation in the 'no start current' zone*
Olgierd Dumbrajs¹, Gregory S. Nusinovich²
¹Institute of Solid State Physics, University of Latvia, Riga, Latvia
²Institute for Research in Electronics and Applied Physics, University of Maryland, USA
26. *Simulation of components for gyro-devices coupled in a feedback loop to generate ultra-short RF pulses*
A. Marek¹, K.A. Avramidis¹, S.M. Coplestone², N.S. Ginzburg³, S. Illy¹, J. Jelonnek^{1,4}, J. Jin¹, P. Ortwein², M. Thumm^{1,4}
¹IHM, ⁴IHE, Karlsruhe Institute of Technology (KIT), Karlsruhe, Germany
²Institute of Aerodynamics and Gas Dynamics, University of Stuttgart, Stuttgart, Germany
³Institute of Applied Physics, RAS (IAP- RAS), Nizhny Novgorod, Russia

27. *Unknown peculiarity of the orotron two row periodic structure*
E.A. Myasin, A.N. Solov'ev
 Fryazino branch of the Kotel'nikov Institute of Radioengineering and Electronics of RAS, Russia
28. *Subterahertz orotron with one and two electron beams*
E.A. Myasin, V.V. Evdokimov, A.Yu. Il'yn
 Fryazino branch of the Kotel'nikov Institute of Radioengineering and Electronics of RAS, Russia
29. *THz generation from high-Q Fano metallic metamaterial*
Seontae Kim, Gun-Sik Park
 Department of Physics and Astronomy, Seoul National University, Seoul, Korea
30. *Towards Fully Automated Systems for the Generation of Very High Order Modes in Oversized Waveguides*
T. Ruess¹, K. A. Avramidis¹, M. Fuchs¹, G. Gantenbein¹, S. Illy¹, F.-C. Lutz¹, A. Marek¹, S. Ruess^{1,2}, T. Rzesnicki¹, M. Thumm^{1,2}, D. Wagner³, J. Weggen¹, J. Jelonnek^{1,2}
¹IHM, ²IHE, Karlsruhe Institute of Technology (KIT), Karlsruhe, Germany
³Max Planck Institute for Plasma Physics, Garching, Germany
31. *Gyrotron mm-wave radiation for dense plasma fluxes production from ECR discharge in a single solenoid*
S.V. Golubev, R.A. Shaposhnikov, I.V. Izotov, R.L. Lapin, S.V. Razin, A.V. Sidorov, V.A. Skalyga
 Institute of applied physics RAS, Nizhny Novgorod, Russia
32. *Generation of Powerful Subterahertz Superradiance Pulses for High-Gradient Acceleration of Charged Particles*
A. Vikharev¹, N. Ginzburg^{1,2}, S. Kuzikov¹, I. Zotova¹, M.Yalandin³
¹Institute of Applied Physics RAS, Nizhny Novgorod, Russia
²N. I. Lobachevsky State University, Nizhny Novgorod, Russia
³Institute of Electrophysics, UB RAS, Ekaterinburg, Russia
33. *The project of third harmonic medium power W-band gyrotron*
A.S. Zuev, A.P. Fokin, M.Y. Glyavin, R.M. Rozental, A.S. Sedov, E.S. Semenov
 Institute of applied physics RAS, Nizhny Novgorod, Russia
34. *Design of mm-wave slow-wave devices with sheet and hollow electron beams*
A.E. Fedotov¹, V.L. Bratman^{1,2}, P.B. Makhlov¹, V.N. Manuilov^{1,3}
¹Institute of Applied Physics, Nizhny Novgorod, Russia,
²Ariel University, Ariel, Israel
³Nizhny Novgorod State University, Nizhny Novgorod, Russia
35. *Development of powerful long-pulse Bragg FELs operating from sub-THz to THz bands based on linear induction accelerators: recent results and projects*
N.Yu. Peskov¹, N.S. Ginzburg¹, A.M. Malkin¹, A.S. Sergeev¹, V.Yu. Zaslavsky¹, A.K. Kaminsky², S.N. Sedykh², A.V. Arzhannikov³, S.L. Sinitsky³
¹IAP RAS, N.Novgorod
²JINR, Dubna
³BINP SB RAS, Novosibirsk
36. *Terahertz-Range Gyrodevices of Planar Geometry*
V.Yu. Zaslavsky, N.S. Ginzburg, I.V. Zotova, M.Yu. Glyavin, A.S. Sergeev, R.M. Rozental, A.M. Malkin, I.V. Zheleznov
 Institute of Applied Physics of the RAS, Nizhny Novgorod, Russia
37. *Powerful surface-wave oscillators with one-dimensional and two-dimensional periodic planar structures*
N.S. Ginzburg, A.M. Malkin, N.Yu. Peskov, A.S. Sergeev, V.Yu. Zaslavsky, A.E. Fedotov
 Federal Research Center Institute of Applied Physics of the RAS
38. *Generation of Sub-Terahertz Surface Waves by Relativistic Electron Beams: Quasioptical Theory, Simulations and Experiments*
Naum S. Ginzburg¹, A.M. Malkin¹, I.V. Zheleznov¹, V.Yu. Zaslavsky¹, A.S. Sergeev¹, I.V. Zotova¹, M.I. Yalandin²
¹Institute of Applied Physics RAS, Nizhny Novgorod, Russia,
²Institute of Electrophysics RAS, Ekaterinburg, Russia
39. *YBa₂Cu₃O_{7-δ} Josephson generators fabricated by preliminary topology masks*
L.S. Revin^{1,2}, A.L. Pankratov^{1,2,3}, D.V. Masterov¹, A.E. Parafin¹, S.A. Pavlov¹, A.V. Chiginev^{1,2}, I.V. Rakut^{2,3}, A.V. Gordeeva^{1,2}, V.O. Zbrozhek², A.V. Blagodatkina^{1,2}, L.S. Kuzmin^{2,4}
¹Institute for Physics of Microstructures of RAS, Nizhny Novgorod, Russia,
²Nizhny Novgorod State Technical University, Nizhny Novgorod, Russia
³Lobachevsky Nizhny Novgorod State University, Nizhny Novgorod, Russia
⁴Chalmers University of Technology, Gothenburg, Sweden

S2. Optoelectronic & solid-state sources of THz radiation

1. *THz stimulated emission at interband transitions in HgTe/CdHgTe quantum wells*
V.I. Gavrilenko¹, V.V. Rumyantsev¹, A.A. Dubinov¹, S.V. Morozov¹, N.N. Mikhailov², S.A. Dvoretzky², F. Teppe³, C. Sirtori⁴
¹Institute for Physics of Microstructures, Nizhny Novgorod, Russia
²A.V.Rzhanov Institute of Semiconductor Physics, Siberian Branch of RAS, Novosibirsk, Russia
³Charles Coulomb Laboratory, University of Montpellier & CNRS, Montpellier, France
⁴Laboratory of Materials and Quantum Phenomena, University Paris-Diderot, Paris, France
2. *Electronic Tunneling and Electric Domains in GaAs/AIAs Superlattices at Room Temperature*
I.V. Altukhov¹, M.S. Kagan¹, S.K. Paprotskiy¹, N.A. Khvalkovskiy¹, I.S. Vasil'evskii², A.N. Vinichenko²
¹V.A. Kotel'nikov Institute of Radio Engineering and Electronics, Russian Ac. Sci., Moscow, Russia
²National Research Nuclear University MEPhI, Moscow, Russia
3. *Wideband Josephson THz flux-flow oscillator integrated with the slot lens antenna and the harmonic mixer*
N.V. Kinev¹, K.I. Rudakov^{1,2,3}, L.V. Filippenko¹, A.M. Baryshev³, V.P. Koshelets¹
¹Kotel'nikov Institute of Radio Engineering and Electronics of RAS, Moscow, Russia
²Moscow Institute of Physics and Technology, Dolgoprudny, Russia
³University of Groningen, Netherlands
4. *Evidence of synchronization of large Josephson-junction arrays by traveling electromagnetic waves*
M.A. Galin^{1,2}, E.A. Borodianskiy², V.V. Kurin¹, I.A. Shereshevskiy¹, N.K. Vdovicheva¹, V.M. Krasnov², A.M. Klushin¹
¹Institute for Physics of Microstructures RAS, Nizhny Novgorod, Russia
²Department of Physics, Stockholm University, AlbaNova University Center, Stockholm, Sweden
5. *Long-Pulsed Modulation Regimes of Subterahertz Nanosecond Waveguide Switches*
Maxim L. Kulygin¹, G.G. Denisov^{1,2}, A.P. Fokin¹, E.A. Novikov¹, S.H. Salahetdinov¹, S.V. Shubin¹, I.A. Litovsky²
¹Institute of Applied Physics RAS, Nizhny Novgorod, Russia
²Lobachevski State University, Nizhny Novgorod, Russia
6. *Active Josephson traveling wave antennae as prospective terahertz oscillators*
V.V. Kurin, N.K. Vdovicheva, I.A. Shereshevskii
 Institute for Physics of Microstructures RAS, Nizhny Novgorod, Russia
7. *Generation of THz radiation by photoconductive antennas on based thin films InGaAs and InGaAs/InAlAs*
A.A. Leontyev¹, K.A. Kuznetsov¹, G.B. Galiev², G.Kh. Kitaeva¹, V.V. Kornienko¹, E.A. Klimov², A.N. Klochkov², S.S. Pushkarev², P.P. Maltsev²
¹Lomonosov Moscow State University, Moscow 119991, Russia
²Institute of Ultrahigh Frequency Semiconductor Electronics, RAS, Moscow, Russia
8. *High Photoconductivity in Heavily Doped GaAs/AIAs Superlattices with Electric Domains*
S.K. Paprotskiy¹, I.V. Altukhov¹, M.S. Kagan¹, N.A. Khvalkovskiy¹, I.S. Vasil'evskii², A.N. Vinichenko²
¹V.A. Kotel'nikov Institute of Radio Engineering and Electronics, Russian Ac. Sci., Moscow, Russia
²National Research Nuclear University MEPhI, Moscow, Russia

9. *Plasmonic terahertz antennas with high-aspect ratio metal gratings*
A.E. Yachmenev^{1,2}, D.V. Lavrukhin^{1,2}, I.A. Glinskiy^{1,2}, R.A. Khabibullin^{1,2,3}, R.R. Galiev¹, A.Yu. Pavlov^{1,2}, Yu.G. Goncharov², I.E. Spektor², M. Ryzhii⁵, T. Otsuji⁶, K.I. Zaytsev^{2,4}, D.S. Ponomarev^{1,2,3}
¹Institute of Ultra High Frequency Semiconductor Electronics of RAS, Moscow, Russia
²Prokhorov General Physics Institute of RAS, Moscow, Russia
³Center for Photonics and 2D Materials, Moscow Institute of Physics and Technology, Dolgoprudny, Russia
⁴Bauman Moscow State Technical University, Moscow, Russia
⁵Department of Computer Science and Engineering, University of Aizu, Aizu-Wakamatsu, Japan
⁶Research Institute of Electrical Communication, Tohoku University, Japan
10. *Doubling of gyrotron radiation frequency due to nonlinear susceptibility in A3B5 semiconductors*
Vladimir V. Rummyantsev¹, A. A. Dubinov¹, A.P. Fokin², V.V. Utochkin¹, M.Yu. Glyavin², S.V. Morozov¹
¹Institute for Physics of Microstructures of RAS, Nizhny Novgorod, Russian Federation
²Institute of Applied Physics of RAS, Nizhny Novgorod, Russian Federation
11. *Molecular beam epitaxial growth of semiconductor heterostructures for THz electronics*
Victor M. Ustinov^{1,2}
¹Ioffe institute, St. Petersburg, Russia; ²SHM R&E Center, RAS, St. Petersburg, Russia
12. *Continuously Tunable Spintronic Emission in the sub-THz Range*
I. Ilyakov¹, N. Awari^{1,2}, S. Kovalev¹, C. Fowley¹, K. Rode³, Y.-C. Lau³, D. Betto³, N. Thiyagarajah³, B. Green¹, O. Yildirim¹, J. Lindner¹, J. Fassbender¹, M. Coey³, A. Deac¹, M. Gensch¹
¹HZDR, Dresden, Germany
²University of Groningen, Netherlands
³CRANN, AMBER and School of Physics, Trinity College Dublin, Ireland
13. *Frequency comb for THz metrology and spectroscopy*
C. Bray¹, A. Cuisset¹, F. Hindle¹, J.F. Lampin², G. Mouret¹
¹Laboratoire de Physico-Chimie de l'Atmosphère, Université du Littoral Côte d'Opale, France
²Institute of Electronics, Microelectronics and Nanotechnology, University of Lille, France
14. *Theoretical and experimental studies of dielectric two-dimensional Bragg structures for development of spatially-extended heterolasers*
N.Yu. Peskov, V.R. Baryshev, N.S. Ginzburg, E.R. Kocharovskaya, A.M. Malkin, D.M. Padozhnikov, M.D. Proyavin, V.Yu. Zaslavsky
 Institute of Applied Physics of the RAS, Nizhny Novgorod, Russia
15. *Terahertz lasers based on donor intracenter transitions in silicon*
V.N. Shastin
 Institute for Physics of Microstructures, Nizhny Novgorod, Russia

S3. Generation of THz radiation by intense laser pulses

1. *A modified tilted-pulse-front excitation scheme for efficient terahertz generation in LiNbO₃*
S.B. Bodrov^{1,2}, A.N. Stepanov², E.A. Burova¹, M.I. Bakunov¹
¹University of Nizhny Novgorod, Nizhny Novgorod 603950 Russia
²Institute of Applied Physics of the RAS, Nizhny Novgorod, Russia
2. *Laser induced THz Sommerfeld waves along metal wire*
A.V. Brantov^{1,2}, A.S. Kuratov¹, A. Maksimchuk³, Yu.M. Aliev², V.Yu. Bychenkov^{1,2}
¹Dukhov Research Institute of Automatics (VNIIA), Moscow, Russia,
²P.N. Lebedev Physics Institute, RAS, Moscow, Russia
³Center for Ultrafast Optical Science, University of Michigan, Ann Arbor, USA
3. *Modulation of two-color laser-induced filament terahertz emission by effective length variation*

19. *Nonthermal impact of terahertz radiation on living systems*
S.E. Peltek¹, I.A. Meshcheryakova¹, T.N. Goryachkovskaya¹, E.V. Kiseleva¹, A.S. Rozanov¹, E.V. Demidova¹, K.V. Starostin¹, A.V. Bryanskaya¹, S.V. Sergeeva¹, P.S. Loshenova, D.Y. Oshchepkov¹, E.A. Demidov¹, G.L. Dianov¹, M.A. Logarkova³, S.L. Kiselev³, M. Timofeeva², N.A. Vinokurov², V.M. Popik², M.A. Scheglov²
¹Institute of Cytology and Genetics SB RAS, Novosibirsk, Russia
²Budker Institute of Nuclear Physics SB RAS, Novosibirsk, Russia
³Vavilov Institute of General Genetics RAS, Moscow, Russia
20. *Study of PVC-based Skin Phantom with graphite particles in Terahertz Frequency Range*
T. Zhang¹, P.S. Demchenko¹, A.P. Popov^{1,2}, I.V. Meglinski^{1,2}, A.V. Bykov^{1,2}, M.K. Khodzitsky¹
¹ITMO University, St. Petersburg, Russia
²University of Oulu, Oulu, Finland
21. *The mechanism of the effect of microwave radiation on the parameters of homeostasis in living systems*
A.G. Polyakova, A.G. Soloveva, M.V. Presnyakova, V.L. Kuznetsova, P.V. Peretyagin, I.E. Sazonova
 Federal State Budgetary Educational Institution of Higher Education «Privolzhsky Research Medical University» of the Ministry of Health of the Russian Federation, Nizhny Novgorod, Russia,
22. *Investigation of interaction of THz radiation with blood components*
S.I. Gusev¹, T. Zhang¹, V.Yu. Soboleva¹, Yu.A. Kononova², V.A. Guseva¹, P.S. Demchenko¹, E.A. Segykh¹, M.K. Khodzitsky¹
¹ITMO University, St. Petersburg, Russia,
²Federal Almazov North-West Medical Research Centre, St. Petersburg, Russia

23. *The influence of terahertz radiation on biochemical metabolism of blood in the experiment*
A.G. Soloveva, P.V. Peretyagin, A.G. Polyakova, N.V. Didenko
 Federal State Budgetary Educational Institution of Higher Education «Privolzhsky Research Medical University» of the Ministry of Health of the Russian Federation, Nizhny Novgorod, Russia
24. *Intraoperative diagnosis of malignant brain gliomas using terahertz pulsed spectroscopy and optical coherence tomography*
K.I. Zaytsev^{1,2}, I.N. Dolganova^{2,3}, N.V. Chernomyrdin^{1,2}, G.A. Komandin¹, M.A. Schcedrina⁴, S.-I.T. Beshplav⁵, S.A. Goryaynov⁵, V.E. Karasik², I.V. Reshetov⁴, A.A. Potapov⁵, V.V. Tuchin^{6,7,8}
¹Prokhorov General Physics Institute of the RAS, Moscow, Russia;
²Bauman Moscow State Technical University, Moscow, Russia;
³Institute of Solid State Physics of the RAS, Chernogolovka, Russia;
⁴Sechenov University, Moscow, Russia;
⁵Burdenko Neurosurgery Institute, Moscow, Russia;
⁶Saratov State University, Saratov, Russia;
⁷Tomsk State University, Tomsk, Russia;
⁸Institute of Precision Mechanics and Control of the RAS, Saratov 410012, Russia

Special Section "Status of the User Facilities Centers"

1. *THz science at FELBE*
J. Michael Klopff, Harald Schneider
 Institute of Radiation Physics, Helmholtz-Zentrum Dresden-Rossendorf, Dresden, Germany
2. *Terahertz and mm-wave applications at ENEA-Frascati*
G.P. Gallerano, S. Ceccuzzi, A. Doria, E. Giovenale, G.L. Ravera, M. Zerbini, G. Galatola-Teka
 ENEA – Fusion Physics Division – Radiation Sources, Antennas and Diagnostics Laboratory Frascati – Italy
3. *From millimeter to microns – IAP RAS powerful sources for various applications*
M.Yu. Glyavin, G.G. Denisov, E.A. Khazanov
 Institute of Applied Physics RAS, Nizhny Novgorod, Russia
4. *Ultrafast THz-pump & Electron-probe Facility (ci-rcus) at KAERI*
Young Uk Jeong^{1,2}, Nikolay Vinokurov³, Hyun Woo Kim^{1,2}, In Hyung Baek^{1,2}, Key Young Oang¹, Mi Hye Kim¹, Young Chan Kim¹, Kyu-Ha Jang^{1,2}, Kitae Lee^{1,2}, Seong Hee Park⁴, Sergey Miginsky^{1,3}, Jungwon Kim⁵, Fabian Rotermund⁵, Sunglae Cho⁶
¹Korea Atomic Energy Research Institute, Daejeon, Korea,
²University of Science and Technology, Daejeon, Korea
³Budker Institute of Nuclear Physics, Novosibirsk, Russia
⁴Korea University, Sejong, Korea
⁵Korea Advanced Institute of Science and Technology, Daejeon, Korea
⁶Ulsan University, Ulsan, Korea
5. *Recent experiments at NovoFEL user stations*
B.A. Knyazev^{1,2}, I.A. Azarov³, E.N. Chesnokov⁴, Yu.Yu. Choporova^{1,2}, V.V. Gerasimov^{1,2}, Ya.I. Gorbachev¹, Ya.V. Getmanov^{1,2}, B.G. Goldenberg¹, O.E. Kameshkov^{1,2}, P.V. Koshlyakov⁴, I.A. Kotelnikov^{1,2}, A.S. Kozlov⁴, V.V. Kubarev^{1,2}, G.N. Kulipanov¹, S.B. Malyshev⁴, A.K. Nikitin^{2,5}, P.A. Nikitin⁶, N.D. Osintseva¹, V.S. Pavelyev^{1,7}, S.E. Peltek⁸, A.K. Petrov⁴, V.M. Popik¹, T.V. Salikova¹, M.A. Scheglov¹, S.S. Seredniakov¹, V.N. Shastin⁹, O.A. Shevchenko¹, V.A. Shvets^{1,2}, D.A. Skorokhod¹, A.N. Skrinsky¹, S.L. Veber¹⁰, N.A. Vinokurov^{1,2}, V.B. Voloshinov⁶, R.Kh. Zhukavin⁹
¹Budker Institute of Nuclear Physics, Siberian Branch of RAS, Novosibirsk, Russia,
²Novosibirsk State University, Novosibirsk, Russia
³Rzhanov Institute of Semiconductor Physics, Siberian Branch of RAS, Novosibirsk, Russia

⁴Voevodsky Institute of Chemical Kinetics and Combustion, Siberian Branch of RAS, Novosibirsk, Russia

⁵Scientific and Technological Center of Unique Instrumentation, RAS, Moscow, Russia

⁶Lomonosov Moscow State University, Moscow, Russia

⁷Samara State University, Samara, Russia

⁸Institute of Cytology and Genetics, Siberian Branch of RAS, Novosibirsk, Russia

⁹Institute for Physics of Microstructures, RAS, Nizhny Novgorod, Russia

¹⁰International Tomography Center, Siberian Branch of RAS, Novosibirsk, Russia

6. *Novosibirsk Free Electron Laser Facility*

**O.A. Shevchenko¹, N.A. Vinokurov^{1,2}, V.S. Arbuzov¹, K.N. Chernov¹, I.V. Davidyuk^{1,2},
O.I. Deichuly¹, E.N. Dementyev¹, B.A. Dovzhenko¹, Ya.V. Getmanov^{1,2}, Ya.I. Gorbachev¹,
